

**Press release**

## **HUECK UK Named – Best Aluminium Construction Systems Manufacturer – UK & Ireland**

The ever-popular Construction & Engineering Awards, now celebrating its fourth annual year at BUILD, is delighted to return in 2018 and name HUECK UK as “Best Aluminium Construction Systems Manufacturer”– UK & Ireland.

The awards process started with the voting form which was placed live on the Build website for just over three months. primarily a notification was then sent out to the readership base (110,000+ worldwide) letting them know voting was open and in addition was then posted on various social media platforms to help encourage the voting form to be shared!

Following on from the voting stage HUECK UK was contacted regarding the nomination that had been received and confirmed they wished to be accepted for the nomination and join the awards program. Once accepted the research stage began. A questionnaire was sent across for supporting evidence and the in-house

research team compiled a case file containing information such as – company history, services, articles, press releases, product reviews and client testimonials. Once all case files were completed they were then passed to the judging panel who discussed and deliberated to decide who they believe deserved to win – with HEUCK UK going on to be successful!

HUECK UK have been named - Best Aluminium Construction Systems Manufacturer - UK & Ireland.

As the sector continues to bounce back, following a turbulent year HUECK UK is leading from the front, doing what it does best, designing and building the best environment around

us, with sustainable solutions, greater HSE standards and regulations including ever challenging environmental considerations.

The markets involved in these endeavours, continue to experience growth. The awards program engages in the process of honouring those whose work spans civil, commercial, energy, residential, industrial and infrastructure projects.

Established in 1814 by the HUECK brothers in Lüdenscheid, Germany HUECK is one of the world's largest manufacturers and suppliers of aluminium profile systems for window, door, and façade applications.

HUECK's core values remain the same today, as they

were 200 years ago: to provide the best possible engineering solution for their partners, both in terms of product, as well as service. HUECK's knowledge and expertise in both special project solutions, as well as standard door, window and façade systems is backed by the extensive support and training they offer to their trade fabricators, and clients, developing and perfecting over the last 60 years a comprehensive range of aluminium profiles to suit all types of applications, whilst proactively helping their partners to successfully deliver projects from start to completion. Some of HUECK's most acknowledged clients include Canary Wharf contractors and Telford homes. Current projects include Stratosphere in Stratford and Gallions Point located near London Docks, with clients benefiting from expert support covering product selection, design intent, building regulations and adaptation of standard systems to meet project specifications. The support starts with the UK development team, evaluating the client's design needs. This is then followed by basic design support, U-value calculation, and product selection ensuring project success and client satisfaction by offering a technical solution fitting specification and within budget. HUECK is one of Europe's largest and most experienced aluminium extruders, this allows clients to benefit from great flexibility in terms of production and design. All HUECK aluminium systems are designed to integrate with each other, so whatever the project, they're able to create a complete, uniform solution. Following an outstanding, record year of growth in 2017, HUECK

have continued to develop relationships with top clients as well as securing major projects in and around London. HUECK are currently working towards new products, including a new curtain wall system. 2018 has proved to be an extremely successful year for HUECK thus far and are confident that as a company they will continue to grow and excel, with potential to work on many more major projects.
